## Skills

**React | JavaScript | HTML | CSS | DSA | Java | Python | Fast API | REST API Microservices | SQL | NoSQL | Docker | Swagger | Postman | Figma | CRM | Datadog | GitHub | Bitbucket | Git**

## Work Experience

**AREX** | React Developer

**June 2024 - Present**

- Built React UIs for uploading **CSV, Excel, and fixed-width files** to **SharePoint and SFTP**, supporting single/multi-file uploads, including file encryption and **database connection setup**.
- Architected and developed the complete Observability Platform UI** from scratch, enabling real-time monitoring, system health tracking, and data flow visualization for enterprise-scale applications.
- Created a detailed **Help page** and contributed to **UI translations** for multilingual support, improving product accessibility for global users.

**Ingram Micro** | Software Engineer

**Oct 2021 – June 2024**

Insights | Quoting and Ordering

- Built **custom dashboards and visualizations** in **React**, collaborating with the data team to deliver real-time insights.
- Developed and deployed a **chatbot UI** and implemented **PDF/Excel export** features using React libraries.
- Engineered and optimized **microservices** and **legacy APIs** using **.NET**, reducing quoting process time by 20%.
- Key contributor to developing and implementing quoting & ordering flows for **10+ countries**.
- Collaborated with cross-functional teams to ensure smooth **frontend-backend integration**.
- Used **React Hooks**, modular components, and **Datadog** to monitor API interactions and improve UI reliability.

**TCS Ion** | Software Developer (Internship) | [Link](#)

**Aug 2021 – Sep 2021**

- Developed **Docker containers** using the **Java stack**, enhancing application portability and **scalability**.
- Gained hands-on experience in container orchestration and management.

**Pepcoding Education (OPC) Private Limited** | Software Developer(Internship) | [Link](#)

**June 2020 – June 2021**

- Acquired proficiency in **data structures and algorithms** using **Java**, enhancing problem-solving skills and **algorithmic thinking**.
- Developed a strong foundation in the **MERN** (MongoDB, Express.js, React, Node.js) stack, gaining hands-on experience in **full-stack web development**.

## Projects

**E-Commerce Dashboard** | **ReactJs, Fast API, PostgreSQL** | [Link](#)

- Engineered a full-stack e-commerce dashboard with FastAPI and React, leveraging PostgreSQL (NeonDB) for scalable data management, Cloudinary for media, and deployed via Render & Vercel with CI/CD.
- Implemented **secure authentication (JWT)** with login, registration, and session management.
- Built core modules: **Product Management, Categories, Cart, Orders, and Checkout**.

**Resume Builder** | **ReactJs, Firebase, Redux, Saas** | [Link](#)

- I developed a Resume Builder application using React and Firebase technologies. Leveraged React functionalities including routing, Redux state management, and Thunk middleware for asynchronous actions.
- Implemented Firebase for user authentication and database management and Sass for styling to enhance user interface design and experience.
- User can use the readymade templated and download resume as a pdf and also can save the info to database.

**Movies App** | **ReactJs, Bootstrap** | [Link](#)

- Built a movies application with React using class components and styled with bootstrap. Integrated TMDB API to fetch and display movie data in the application.

## Education

**B. Tech / B. E | Computer Science Engineering | CGPA: 8.0**

**2017-2021**

University of Mumbai, Datta Meghe College of Engineering Airoli, Navi Mumbai

**Higher Secondary School** | Rajeshwar Union Junior College, Amravati

**2015-2017**

**Secondary School** | Rajeshwar Union High School, Amravati

**2014-2015**

## Achievements & Certifications

- Solved **500+** DSA problems on Leetcode, Geeks for geeks and Pepcoding.
- REST Api with Postman for Absolute beginner on Udemy. [Link](#)
- completion of an extensive Udemy course covering database design, querying, and optimization. [Link](#)
